SALESLOGIX FOR POCKET PC

Full Featured CRM Solution on a Handheld Device

SalesLogix for Pocket PC allows you to view, edit and add contact and account details, take notes, schedule meetings, complete activities, update opportunities and review ticket information, all from a handheld device. You can quickly access key customer information using quick lookups or filtered searches. SalesLogix for Pocket PC allows full account, contact, opportunity and ticket management from the handheld device so employees always have access to the most up to date customer information, whether in the office or on the road.

Rich End-User Experience

Since SalesLogix for Pocket PC replicates the familiar SalesLogix interface on the Pocket PC device, it's easy to get up and running quickly. SalesLogix for Pocket PC offers incredible speed and performance. Rich features such as one-click dialing from a contact record, handwriting recognition and integration with Pocket Outlook enable users to get the most from SalesLogix, while taking advantage of the convenience and productivity afforded by a handheld device.

The Information You Need, How You Need It

Many SalesLogix customers tailor SalesLogix to meet their unique business requirements. In addition to basic contact and account information, with SalesLogix for Pocket PC, you can access data from custom tables, extensions, pick lists and other customized fields. The mobile client application can also be easily customized using visual drag-and-drop design tools.
